

# MODU-CONNECT

## PRODUCT SPECIFICATIONS

### DETAILS

Measurements:  
95x60x5 mm

Price: €249

### REQUIREMENTS

When using the Modu-connect, you need:

- Modu-tool
- New SIM card

### PURPOSE

If an engineer has difficulties repairing the lift, the Modu-Connect pack provides easy remote access to the Modu-Tool. That means that there is no longer the need for another technician to assist the engineer on the ground. The big advantage is that the technician can provide help at any place. This can save time, but also extra costs.

In order to upskill engineers, the Modu-Connect enables long distance training. The beginning engineer uses the Modu-Tool and while he is repairing the lift, a more experienced technician can provide help at the same time on the internet. These two are connected with each other. In this way, the technician can accompany the engineer with his task.

The Modu-Connect is the link between the Modu-Tool and the internet. It is a safe device, because only the Modu-Tool can make the connection and the data on the internet is only accessible with a unique secured log-in. With the data on the internet, the Modu-Connect and the Modu-Tool you can manage your own systems and give support in a safe environment.

### COMPONENTS

The Modu-connect package contains a WiFi stick for in the Modu-tool, a MiFi link, webserver access and a set-up webserver. You only have to arrange the SIM card yourself.
