

MODU-LCE 2

PRODUCT SPECIFICATIONS

DETAILS

Measurements:
35x15x10

Price: €99

PURPOSE

This Modu-Ice 2 prevents a Kone LCE menu from locking again. After you've unlocked a Kone LCE menu, it will lock again when it has reached 10.000 runs (or 100 runs for a LCE with software higher than 6.8.7). When you attach the Modu-Ice to the NVRAM of the lift, the elevator will stop counting the runs of the lift, so won't lock again. This Modu-Ice is with 32 pins.

COMPATIBILITY

You can have to use this 32 pins on a LCE 375CPU40. For the LCE 375 you need a 28 pins.

LCE CONTROLLERS

To use this product, you must first unlock the LCE controller.

- Unlock LCE with software 6.6.xx and lower with the Modu-tool and Modu-prog
- Unlock LCE with software 6.7.18 with a new eprom
- Unlock LCE with software 6.8.7 or higher with just the Modu-tool

After the menu has been unlocked, you must keep the Modu-Ice on an elevator control to keep it open.
